J # R Markdown

```
## Warning: package 'readr' was built under R version 3.5.3
```

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see bookdown.org/yihui/rmarkdown.

Using R and Markdown

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

And you can use in-line code to show your results in the text: 15.4.

The SD of the speed of cars is: 5.

(Bosnjak et al. 2018) You could also run R calculations in the code like this 30.8, but ensure that your text is still readable.

Table 1: This is an awesome table

A	B	C
1	2	3

Header 3

Lange Liste der laestigen Pflichten beginnt hier.

- Liste
- Liste
  - Liste
- Ende der Liste

The software ...	- -	-	-/+	+	+ +	
is complicated to use	☐	☐	☐	☐	☐	is not complicated to use
is useful	☐	☐	☐	☐	☐	is not useful

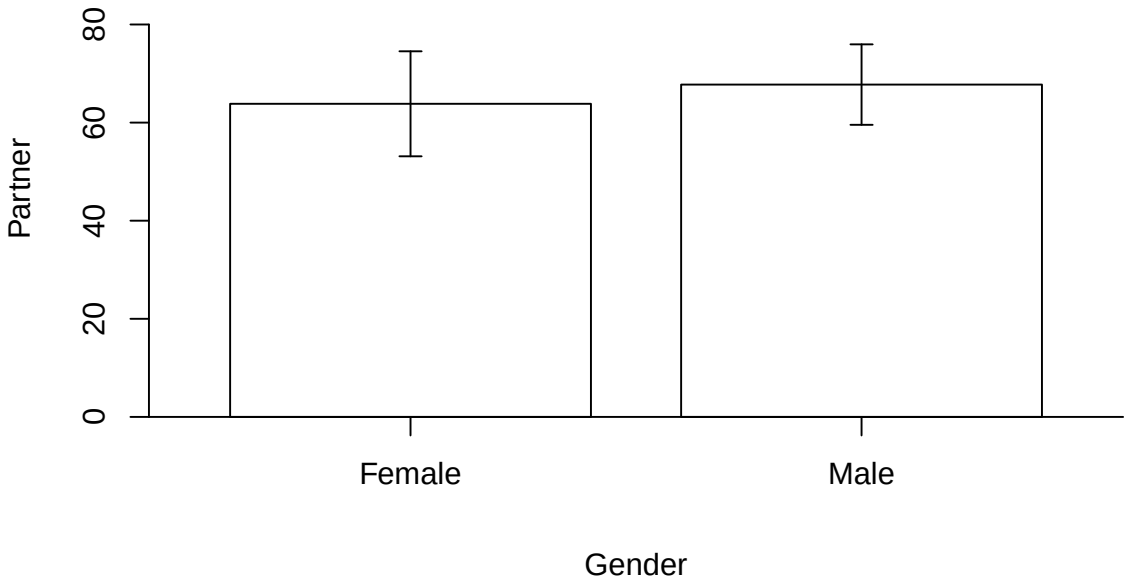

Figure 1: Bildunterschrift

Hier ist ein bisschen Text, den ich mit einer Quelle belege (Berning and Weiß 2016). Außerdem kommt jetzt noch eine Quelle, die mitten im Text steht Bosnjak et al. (2018) und danach noch mehr Text kommt.

Nun kommt eine Grafik.

```
## Parsed with column specification:
## cols(
##   X1 = col_double(),
##   Gender = col_character(),
##   Partner = col_double(),
##   Self = col_double()
## )
```

Hier sieht man nun @ref(fig:figuretest). Das funktioniert leider nicht.
